

NAatural LOGic meets MACHine Learning (NALOMA) 2020
Workshop @ WeSLLI 2020, July 12-17 2020

Authors: Larry Moss

Title: Formalizations and Implementations of Monotonicity Reasoning

Abstract: About half of the talks in the workshop refer to monotonicity reasoning. My presentation will be a gentle introduction to the area, aiming to give people the background they need to follow the other talks. I will also discuss implementations of monotonicity reasoning and connections to machine learning.
