

Sense changes and multiword expressions

Martin Emms and Arun Jayapal

March 2, 2014

Emergence of new n-gram meanings

usage possibilities for n-gram change with time, and a MWE usage may emerge

example *smashed it*

old use: destruction/impact, as in (from 1995)

the wind lifted his three-car garage and **smashed it** to the ground.

recent MWE usage: meaning 'excelled', as in (from 2013)

sensational group CEO, totally **smashed it** in the BGT (Britain Got Talent)

question is:

*Can such **emergence** of an MWE-usage be detected from untagged time-stamped text?*

Model and Training

model roughly : $P(\textit{Usage}|\textit{Time}) \times P(\textit{context} - \textit{words}|\textit{Usage})$

time-stamped raw text

1999: smashed it
⋮	⋮
2013 smashed it

EM
