

Joint Compound/Named Entity Recognition and POS Tagging for Serbian: Preliminary Results (WG3 poster)

Matthieu Constant*, Cvetana Krstev[◇] and Dusko Vitas[◇]

*Univ. Paris-Est - LIGM - CNRS, France, [◇] Univ. Belgrade,
Serbia

- **MWE-aware Part-of-Speech tagging** in Serbian with an **hybrid approach**
- Based on our previous work on French
- Statistical dimension : **Conditional Random Fields** (CRF) learned on an annotated corpus
- Symbolic dimension : some features are computed from **external linguistic resources**
- Comparison of joint and pipeline strategies
- Discussion : extension to other European languages ?
