PARSEME SC meeting at PARSEME 5ᵗʰ General Meeting, Iaşi, Romania

23 September 2015
5 p.m. – 6.30 p.m. (Romanian time)

Participants: Adam, Beata ,Cvetana, Manfred, Veronika, Victoria, Agata, Mike, Yannick
Absent: Miriam

============
SC minutes (by Beata Wójtowicz)

===
- LTC dissemination paper - order of authors
we keep the order as it is

===
- validation of the current STSM requests: 1 application by Meghdad Faraghmad who was already
on a mission last year – approved

===
- update on the Skopje/Struga workshop/meeting - enhancements to the modalities for poster
submissions (if any)
Adam – for some people it was not clear were to put the names, title etc.
Agata – the deadlines will be similar as for Iasi, shifted by 6 months
Victoria – perhaps we should ask people to preface the title of the paper with the WG concerned
add the WG number requirement in EasyChair,
enhancements in call for papers – add information on font type, size, etc.

===
- scientific content for the 2nd training school

Agata - people want to be more interactive, maybe we should collect ideas from trainees of what
topic should be addressed at the TS,

Manfred – it's good to have courses that rely on the local expertise of the organisers
Adam - liked the lectures proposed by the UK; some lectures may also be based on the results of the
ongoing PARSEME SOA surveys

Student session – on some conferences each paper is given a mentor, students may present their
work in small groups led by a lecturer → to be invited to the TS, one has to submit his/her work

Adam – in Prague there were a lot of talks on dependency, maybe this time we should avoid it and
present some other framework – construction grammar?

Manfred proposed Martin Hilpert who does construction grammar and is a good lecturer.

proposals:
 • get topics for courses in advance from trainees,
 • WG4: INESS treebank search and consistency check in treebanks (tutorial + lab)
 • WG2: CCG, Grammatical Framework, construction grammar (Martin Hilpert?),
 • WG3: people from Wolverhampton,
 • student sessions with mentors

- (proposal from later discussions): Walenty + Polfie (by Adam et al.): the whole processing chain from the lexical encoding of MWEs in a valence dictionary to the LFG rules and text parsing; lab on MWE encoding in English with a toy LFG grammar

===
- how to bring more balance to the WG relevance among the posters
    * putting forward the balanced WG relevance as a criterion for poster selection (Victoria)
    * for the next meeting we should encourage submissions to under-represented groups as WG4
- address that in the call

===
- PARSEME follow-up
    * new COST action (submission in 2016 to start in 2017)
    * heavy investment in SIGLEX-MWE
    * others?

===
- date of the next meeting: per video-conference 11 January 2016 2 p.m. CET

===
- trying out another video-conference system:
        * Renater (Google Chrome)
        * Flash Meeting as plan B (Mike will book it)

===
- any other business

Agata – the idea to extend the notion of publications that do not address several countries but are relevant to PARSEME

Cvetana – will get papers relevant to PARSEME from our STSM's participants

===
TODO:

Agata:
+ announce the WG4 preference for posters at the final session
- call for topics for the training school
- schedule for posters to Struga
- first draft of the CFP for Struga with freedback from the SC

Agata+Adam:
- advances on the contents of the 2nd Training School

Mike:
- book Flash Meeting for 11 January 13:30-16:00

Cvetana:
- inform the STSM applicant

All:
- install Chrome before the next SC meeting in January
