

# Variability in Greek multiword compound nouns in the form of Adjective (Adjective) Noun

Vasiliki Foufi Aristotle University of Thessaloniki

## Objective and Tools

- Construction of local grammars with the aim to generate inflected forms for Adjective + Noun compound nouns and their morphosyntactic variants
- Tools: Unitex corpus processor (Paumier 2003, 2012) and Multiflex, a cross-language morphosyntactic generator of multiword units (Savary 2005, 2009)

## Morphosyntactic variants in Greek compound nouns

- Substantivation of the adjective with or without change in number and case
- Deletion of the adjective
- Substantivation and deletion of the adjective in the same compound noun
