

Towards a Better Semantic Role Labeling of Complex Predicates (WG 3, WG 4)

Glorianna Jagfeld*, Lonneke van der Plas*

*IMS, University of Stuttgart, •IoL, University of Malta

- **Aliasing:** map CPs to existing PB entries with the same meaning and argument structure
e.g. *take care* → *care.01* 'to be concerned' [Bonial et al., 2014]
- **Our approach:** Speed up the mapping process with an automatic system using parallel corpora
